

# Sustainability Assessment

## MARINARA SEAFOOD MIX

Our Marinara Seafood Mix contains blanched squid, farmed black tiger prawns, farmed white shrimp, baby octopus, mussels, and imitation crab meat. Please refer to the sustainability assessments for these individual ingredient items accessed through our main product description menu on this website.

### ENVIRONMENTAL IMPACT LEVEL: MODERATE

See individual sustainability assessments for individual ingredients on this website.

### SUSTAINABILITY IMPROVEMENTS NEEDED

See individual assessments for each item on website.

### ACTIONS THAT SEA PORT IS UNDERTAKING

Please see individual ingredient item's sustainability information accessed through our main product description menu on this website.

We created the sustainability assessments for each of our seafood items in order to reveal the existing and potential environmental impacts and risks that are associated with producing them for human consumption. This allowed us to establish the starting position for each of our seafood items along our progressive Go Blue Seafood Sustainability Spectrum. These assessments are only a single snap shot in time and because of this, we will continue to assess and update the critical sustainability needs associated with our supply sources and issue updates to the Go Blue Seafood Sustainability Spectrum as needed. There is a growing global awareness for the need to assure the sustainability of farmed and wild caught seafood and because of this; all around the world positive changes are rapidly occurring at all levels of the seafood supply chain. We will continue to spread this growing awareness and work with our many industry partners to improve the sustainability of all seafood, which we believe is the ideal protein of choice to feed an ever growing world population. Our Go Blue Seafood Sustainability Spectrum serves as our compass and yardstick as we strive to move all our products forward to becoming more sustainable. Please join us in this committed quest and Catch Our Wave® to sustainability by choosing a diverse variety of responsibly produced seafood as part of your diet.
